

### **Cheetah A5330-9 Brushless Outrunner Motor**

No. of Cells:	10 Li-Poly
kV:	260 RPM/V
Max Efficiency:	88%
Max Efficiency Current:	35 - 55A (>84%)
No Load Current:	1.2A @10V
Resistance:	0.052 ohms
Max Current:	80A for 60S
Max Watts:	2960W for 60S
Weight:	596g / 20.9 oz.
Size:	63 mm x 66 mm
Shaft Diameter:	8mm

Comes with prop-adaptor, x-mount, x-mount screws, male bullet connectors installed on motor, and a set of 3 female bullet connectors with shrink wrap.

**Warning** Do not run motor above the manufacturer limits. If running close to the limit, ensure that the motor achieves excellent cooling. Damage caused by over-amping the motor is not covered under manufacturer warranty.
